

<h2 style="text-align: center;">Do Justice</h2>	<h2 style="text-align: center;">Love Mercy</h2>	<h2 style="text-align: center;">Walk Humbly</h2>
<p>You are an architect working on a project to help renovate several local buildings to provide better access to people with physical disabilities.</p>	<p>You are working with the Department of Public Health on a project to help educate young parents on the best ways to provide healthy and nutritious food for their children on a limited budget.</p>	<p>You are working in a research lab and discover that one of the chemicals you are using is very toxic to the organism that causes malaria while having almost no negative side effects on any other organisms or environmental factors.</p>
<p>You are working on a marketing campaign for a new medication which has the promise to significantly decrease the spread of HIV/AIDS, and you are trying to determine the price of the medication and how it will be distributed.</p>	<p>You are working for an agricultural company in the bioengineering company. Your team has figured out how to add specific genes to various plants so that they will produce extra necessary proteins, but you need to determine which proteins you should focus on first.</p>	<p>You are going to start volunteering at a dementia unit at a local hospital/care facility.</p>
<p>You recently got a job with the regional center for food distribution to local food pantries. Your organization receives financial support to buy staple food that is not donated in high enough quantities, and you need to decide which foods to purchase.</p>	<p>You are the head of the research and development department of a research company that develops and manufactures sunscreen.</p>	<p>You are in charge of insurance and benefits for your company. You are thinking of “rewarding” people with good cardiovascular health with lower rates. You want to help identify employees that need extra assistance in making healthy choices.</p>
