

# Beliefs About Knowledge

<b>Belief Statements</b>	<b>Agree</b>	<b>Sometimes Agree</b>	<b>Not Sure</b>	<b>Disagree</b>
1. Science is a collection of objective facts.				
2. If something is just a theory, it is not part of scientific knowledge.				
3. Scientific knowledge consists of things that have been objectively proved.				
4. Scientific statements should be literally true.				
5. Theology tells us literally what God is like.				
6. Subjective models or pictures that help us imagine the world are a part of true science.				
7. Subjective models or pictures that help us imagine the world are a part of true theology.				
8. True statements in science and theology must exactly express the reality they describe.				
9. Scientific statements are more objectively true than theological ones.				
10. Theological statements are more objectively true than scientific ones.
