

Student name \_\_\_\_\_

## Dear parents,

Over the course of this semester, our class has been discussing the many ways in which science can provoke a sense of wonder. We've been learning how to approach our subject matter with an openness to surprise, and practicing ways of responding with gratitude and amazement at how God has shaped the natural world. We'd now like to take some time to share with you what we have been learning. Over the course of the next week, your student will be sharing with you some things that provoke in them a sense of amazement at the complexity, beauty, or surprising nature of creation. As you listen, please feel free to ask questions and learn more; part of this assignment includes challenging students to improve in their ability to communicate well about what they're learning.

Thank you for taking the time to participate in your student's learning process. I think you'll enjoy this assignment!

Sincerely,

---

Please take a minute to provide feedback at the completion of this project by returning this brief form. Circle the word that best describes how your student accomplished the stated class goals for this assignment:

**Extending our interest in science:**

*Very much*                      *Somewhat*                      *Not at all*

**Communicating well about what we are learning:**

*Very much*                      *Somewhat*                      *Not at all*

**Sharing our learning to strengthen our key relationships:**

*Very much*                      *Somewhat*                      *Not at all*

**Communicating about science in a way that conveys wonder:**

*Very much*                      *Somewhat*                      *Not at all*

Is there anything else you'd like to tell us about this project?
