

Relationship Between Ethics, Faith, and Science

Should drug companies pay for scientific studies? Should people of faith have different ethical standards? What kind of research can people do? Are there limits to what they should research? Human Body

When does life begin?

How should patients be prioritized on a transplant waiting list?

How does my faith influence how I do science?

(Am I honest, fair, a good steward of resources, etc.)

Science

How does God view our bodies?
